

Remind, Our Emergency Alert Service

We are using [Remind](#) as an emergency contact system for our church. Through it, we can easily and quickly send out a text message to everyone on the system. One way we would use it would be to notify you if church is cancelled due to bad weather. [Remind](#) is designed to work in a school setting so you will see education terminology as you sign up. Our church is considered a class in this system.

To sign up, choose one of the methods below:

- **If you have a smartphone**, you can get push notifications. On your iPhone or Android phone open your web browser and go to: rmd.at/tmartinse. Follow the instructions to sign up for [Remind](#). You will be prompted to download the mobile app.
- **If your phone is not so smart**, you can still get text notifications. Text the message *@tmartinse* to the number *81010*. If you're having trouble with *81010*, try texting *@tmartinse* to *(941) 787-5566*.
